Purpose of this Presentation

A CIMdata disclaimer

- Deliver an overview of CIMdata's analysis of the PLM market for calendar year 2022
- Present our estimates of direct provider revenues by various categories
- Provide insight into investment changes, trends and market leaders
- A detailed analysis of this research will be provided in CIMdata's 2023 PLM Market Analysis Report series
- All information represent CIMdata's estimates of revenues and investments

Important Notes

How CIMdata prepares the global MAR data

- CIMdata's estimates are for calendar year 2022 and may differ from a provider's fiscal year reported financials
- The relative strength of different currencies can impact growth estimates – all estimates are based on the yearly average for conversion of a currency to US dollars
- All estimates are net of royalties to eliminate any double counting of revenues
 - The royalty paid by a reseller is deducted from their revenue estimate and included within the direct revenues of the appropriate provider's estimate
- There are many acquisitions in some segments that could affect some numbers
 - We will note those during the presentation

Agenda

- PLM Market Analysis
- Overall cPDm Market Analysis
- PLM Provider Analysis
- Provider Sector Analysis
- Concluding Remarks

Research Methodology Overview

How CIMdata gathers PLM market data each year

- Gather data through multiple means
 - Nearly 550 companies get survey workbooks via email
 - Repeated reminders increase response rate
 - Approximately 30 of the world's largest PLM companies interviewed each year
 - Often multiple times to get more insights
 - Separate research conducted in China and Japan
 - Public reporting and other market research used for data collection and cross-check, e.g., Electronic System Design Alliance (formerly EDA Consortium)
 - CIMdata global contacts used as "sanity checks" on anomalous inputs
- Total of approximately 700 companies "touched" by CIMdata process

Comments on Tool Segments

Will be some impact from conflict in Ukraine

Segment	Comments
MCAD-MD	Expect continued slow growth in this segment as auto and A&D stagnate; most opportunity in countries investing in those industries
MCAD-DF	DF segment often affected by recession; results buoyed by Autodesk and PTC move to subscription; SOLIDWORKS a consistent performer
CAM	A bit stronger growth in 2022, expect high end of historical 5-7% range
S&A	Significant M&A activity in market leaders, trends driving growth will remain strong (smart connected product/Industry 4.0, need for more simulation on the left side of the Vee)
EDA	Strong year, even stronger for others besides the leaders; same trends as S&A
AEC	Key to (re)defining the built world, expanding interest in discrete PLM capabilities; oil & gas affected by energy prices, economic turmoil. Severe currency impacts in 2022
Other Tools	Again, smart connected products driving investments; e.g., Atlassian up 30+% again in last fiscal year
